

## Mediabox

The MSP **Mediabox** is your individual online download portal for all your documents, images and other media out of censhare. Therefore, you will no longer have any redundant data maintenance throughout various systems.

**Central administration** | With the Mediabox you can create and control various user roles and rights out of censhare.

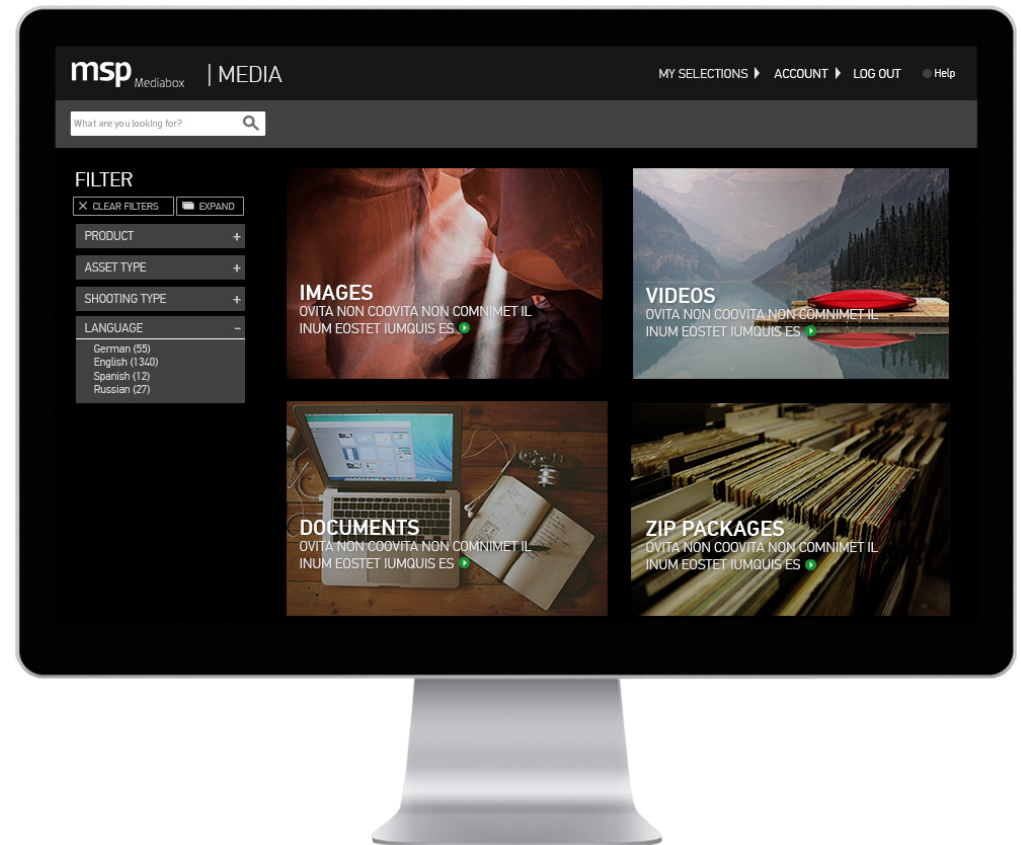

**Easy registration** | Interested parties have the opportunity to create an account (which you can either approve or reject).

**Quick search** | Pre-defined filters and searches for the users makes it easy to find information in the Mediabox.

**Hassle-free organization** | Users can create and administrate folders and add their requested media to it. Furthermore they can download their media in various formats.

**Targeted sharing** | Folders can be shared via a download link straight out of the Mediabox.

**Easy to use** | The Mediabox is similar to any cart system.
