

E-Commerce

Get the digital asset management solutions from censhare for your shop system too. You can transfer existing product data such as texts and images for your online shop with a click on your mouse. If information changes in one part of the system, it will automatically adjust for all communication channels. Localization and translation are also simplified with censhare and the **E-Commerce** module.

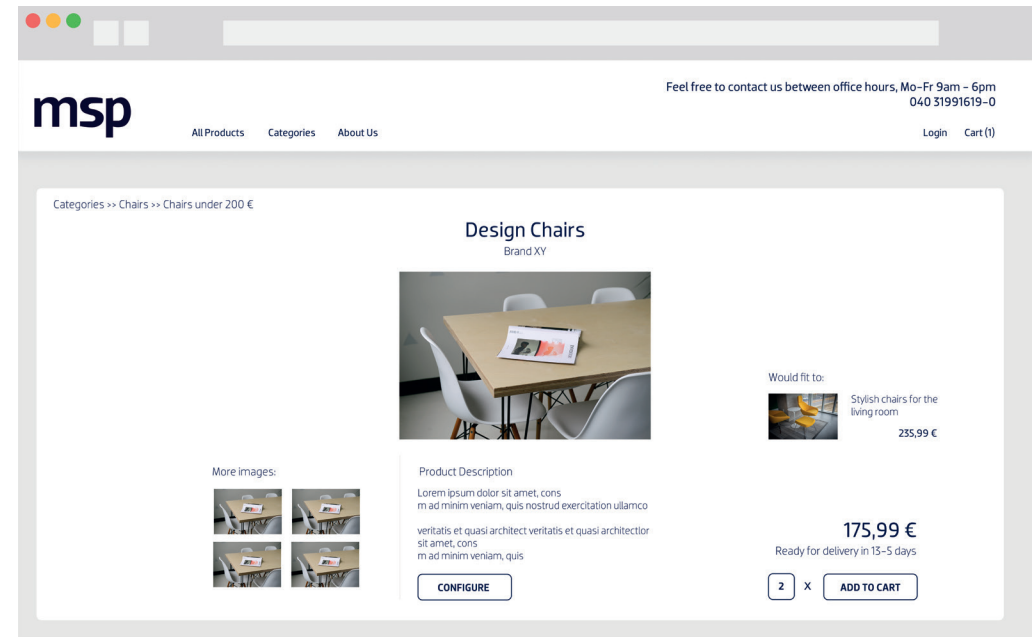

Quick Sale | Sell your products straight out of the censhare technology.

International integrated | With interfaces to leading suppliers of payment services you can connect to PayPal, Ingenico or Stripe.

Create specials | While using the censhare PIM structures you can easily configure special offers and coupons.

Easy connection | Create ties from your E-Commerce shop to various ERP systems.

Well-structured | All of your products will be organized in categories and shown in sorted and filtered lists. Furthermore, every product has a detail page as well.
