

Managed Firewall Services

Your advantages

- No need to purchase your own firewalls
- Cost transparency and planned security
- compliance with legal requirements for data security
- always up to date due to fast update cycles
- always up-to-date hardware and software
- organizational challenges are outsourced

Our service

- installation and maintenance
- firewall monitoring 24/7
- regular updates and continuous further development
- fast hotfixes
- backup of your configuration
- hardware replacement in case of an error

Mobile working requires additional protection

Special security concepts are required for a mobile data connection to the corporate network. We configure our firewall to work with VPN, ensuring data transfer over an authenticated, encrypted channel. This allows you to access tools and databases with information requiring special protection even while traveling by train, at external appointments or in the home office.

What does liability shifting mean for my company?

With the liability shift, you place the responsibility for the protection of your network in our hands. Should a mistake still happen, MSP AG's insurance will take effect – a risk that your company would otherwise have to bear.

Do you have any questions?

Then please contact our **firewall specialist** **Martin Kohl** at **+49 40 31991619-200** or send an e-mail to **vertrieb@mospag.com**.

Three reasons for a managed firewall

...efficiently secure

Save cost and time of purchasing, installing and maintaining your own firewall.

...stay on the ball

MSP constantly integrates new technologies and ensures that you can keep up with Industry 4.0 and IoT.

...reduce own risk

Ensure that all requirements are met when backing up your data/traffic.

Contracts, Features, Upgrades

Tailored to your company

You can choose between different models depending on the size of your company and the duration. In addition, we offer **monthly quotas and SLAs** that you can use for our firewall service but also for other IT services.

Runtime	MSP Firewall 25	MSP Firewall 50	MSP Firewall 100	MSP Firewall 250	MSP Firewall 500
	up to 25 users	up to 50 users	up to 100 users	up to 250 users	up to 500 users
1 year	89 €*	109 €	229 €	399 €	899 €**
3 years	69 €	79 €	169 €	299 €	599 €
5 years	59 €	69 €	159 €	219 €	499 €

*Net monthly plus VAT. **Prices for companies with more than 500 users and IoT environments on request.

THE FURNISHING PRICE IS EQUAL TO THREE MONTHS' RENT
